Command
Coins collected in this level

Cmd:
Coins: 0
Coins to collect: 3

Scoin upgrade bars: they indicate the time left before a particular upgrade expires.

If you are a new player, click on 'New Game' when the homescreen loads.

In every level, there's a time limit and a coin target; collect the required number of coins before the time runs out (the dynamite on the left blows up). Whenever the time runs out, you lose a lasso. If you have zero lassos, the game is over. Every level, two different scoins will be available for you to upgrade your lasso, or to avoid during the game.

You can save your progress by pausing the game (press 'p') and then hitting 's'. This does not store whatever happened in the current level but whatever you finished before it started is saved. You can load a saved a game by clicking on 'Saved Game' instead of 'New Game' when the homescreen appears. At any point during the game, you can pause it ('p') and abort it ('a') to save your highscore before you end it. Note that this does not save your progress.

Here's the demo video:

Key	Control	Key	Control
W	Throws the lasso.	E	Increases the speed of the lasso.
A	Loops the lasso and captures coins.	S	Decreases the speed of the lasso.
D	Yanks the lasso back.	Q	Aborts the game, closes the Window.
Z	Turns the direction of launch clockwise.	P	Pauses the game and displays further options.
X	Turns the direction of launch anti-clockwise.	Other instructions are supplied within the game.	

Scoin	Image	Purpose
Rayscoin		Straightens the path of the lasso; no gravity.
Pausescoin		Freezes the movement of all coins, but does not pause the time.
Dentropyscoin		Restricts the motion of all coins to one dimension.
Slicescoin		Halves the remaining time.
Twicescoin		Doubles the remaining time.
Magnetscoin		Allows you to catch coins from a greater distance.
Scissorscoin		Lowers the range of the lasso to catch coins.
Lifescoin		Gives you an extra lasso.
Bombscoin		Burns one of your lassos.
Projectorscoin		Shows your lasso's trajectory.

Please ignore the other two files titled "Instructions" in the submission; I submitted them before Sir specified how they were to be presented (and there's no option to delete files from Bodhitree) and just repeat the same instructions as the ones in this README.pdf file.
